Processing

When the Burke Library acquired Isasi-Díaz's papers, an attempt was made to maintain the original order she imposed throughout the course of her career. However, some rationalization was introduced for ease of access, research usage and physical preservation. Staples, rubber bands, and metal clips were removed and replaced with plastic clips. Post-it notes and some newspaper clippings were photocopied on acid free paper. All materials were placed in acid-free folders and boxes.

Folded materials were flattened and large items transferred from their original positions into oversized boxes. While oversized items are not listed in their original position in the Contents List, a note in the original folder states a reference to its folder placement in oversized Series 9. Likewise, a note exists in the Series 9 folder referring to the original series folder and contents therein relating to the item.
