

Bibliography of Tibetan Demography
Tibetan Studies and the Social Sciences Workshop
Columbia University, February 2009

Compiled by Geoff Childs
Dept. of Anthropology
Washington University in St. Louis

Compiler's Note: This list grew out of my own research interests in Tibetan and Himalayan demography. Although it includes most major publications, it is not exhaustive. Notably, the list does not include most Chinese-language publications that have appeared in China's social science journals.

Indigenous Tibetan Populations in Nepal and India

Note: I have not included the publications by Tom Fricke and Alan Macfarlane because their research centered on Tamangs and Gurungs, not Tibetans. Nevertheless, they did seminal research in anthropological demography so anybody interested in the topic is strongly encouraged to read their works.
